

PROBLEM STATEMENT :

SMART WASTE MANAGEMENT SYSTEM FOR METROPOLITAN CITIES:

The person have to dispose the wastes in the dustbin,for that the garbages in the dustbins must be collected once it was filled.

- The problem causes uncleanliness in the street.
- It generally occurs in the streets with less number of dustbins.
- The problem occurs due to the lack of garbage collectors who would come periodically to collect the wastes so that the overflow occurs and garbage would spread in the street.
- The problem should be fixed to make a clean and healthy environment.
