

GARBAGE MONITORING SYSTEM

THINK AND FEEL.

**Indicates the excessive load of garbage in the city with the help of sensors*

**Tracking the location of the excessively loaded dustbin by the waste collector*

HEAR?

**The system will prevent the overflow of garbage*

**It will be reduce the pollution*

SEE?

**Large generation of solid residues*

**Dumping can pollute the environment*

**Look for professionals to get to know novel techniques*

**I'm willing to pay a little more to use environmentally friendly materials*

SAY AND DO?

GAIN

**It will eliminate the human involvement*

**It will alert the authorities automatically in case of fire*

PAIN

**Network reliability is a concern*

**Human error is unavoidable*
